TEXAS CROPS AND WEATHER.

Far iers in Jones county are said to be new land and preparing for the gest crop on record.

Large quantities of wheat are being shipped from Miami by the farmers of the Panhandle. The corn and cotton crops in Titus county are nearly gathered.

The continued drouth in Callahan county threatens to prevent any sowing of wheat. In Cooke county the farmers are reported improving the good weather in sowing

their crops. VERNON, WILBARGER COUNTY, TEX., Oct. 20.—The first bale of cotton ever ginned in Wilbarger county was ginned here yesterday by Jones & Cobb. The cotton is of a superior quality, and was raised by G. W. Davis, on Beauer, creek. It is estimated Davis on Beaver creek. It is estimated by Wilbarger county will produce this car 100 bales.

Lubbock, Lubbock county.-There is be ng considerable wheat sowed in this ounty, and the ground is in fine condition, is we have had fine rains lately.

Albany, Shackelford county.-Cotton is ming in rapidly.

Della Plain, Floyd county.—Wheat sow-ing is the order of the day. Parties from Hale county have been here buying seed

BONHAM, FANNIN COUNTY, Oct. 21.-Be-Bonham, Fannin County, Oct. 21.—Between twelve and fifteen thousand bales of cotton have been marketed here up to date. The yards are full of cotton, which is being held on account of the decline in prices. The compress has been busy all the week.

We noticed during our recent trip through Fannin county that almost every farm we passed had plows, hoes, reapers and self-binders left lying and standing in the fields where they were last used, exposed to the weather, rotting and rusting away, the consequence of which negligence will require another outlay of money to buy new tools and implements next year, or will require another outlay of money to buy new tools and implements next year, or cause farmers to pay out considerable money for repairs when they wish to use them again. A self-binder, which costs from \$290 to \$300, left out in the field to take all kinds of weather will not be in very good condition by the time next harvest comes around. Thousands of dollars are lost to the farmers of this county and all over the state by this inexcusable negli-

EMORY, RAINS COUNTY, Oct. 21.-Farmers are busy picking cotton. Owing to the low price of that article, farmers are piling it up in the yard and holding for better prices. The people in this county are paying up acits promptly.

Galveston, Oct 22.—The weekly weather rop bulletin of the Texas state weather ervice was issued to-night for the week ading October 22.

The bulletin gives the temperature, rainfall and crop conditions throughout the state us follows: The rainfall during the past seven days has been generally deficient, no rain having fallen except a few scattered showers. The normal rainfall for the week ranges from

about an inch and a quarter along the coast o a third of an inch in Northwestern por ions of the state tions of the state.

The temperature during the past seven days has been about normal in a few localities along the coast. In other portions of the state it has been generally above nor-

Sunshine has been excessive over the entire state.

The weather has continued unusually favorable for cotton-packing. No frosts have occurred so far to injure the plant in any part of the state.

Many reports indicate a heavier yield than has been previously estimated. The

mild, open weather has given late cotton and the top crop, which were so unfavor-ably affected by the weather during the latter part of August and the first days of september, time to mature, and it is now beginning to open. With continued favor-uple weather in Texas, such as often occurs, the crop will be heavier than any estimate since the middle of August, as the cotton crop has been known to continue making in many parts of the state until the last of December and picking to extend into January, and fields have been found white as

late as February. More rain is needed in the northwestern portion of the state for plowing and wheat sowing; however, wheat sowing is progressing rapidly.

The opening was easy and close to the closing figure of yesterday, but the shorts were scared and nervous and proceeded to cover. When the crowd got over its scare selling became about as urgent as the buying had previously been, and all improvement was soon lost, together with as much more to the other side. December opened 140 lower at 150c, 10d steadily up to 1960c.

much more to the other side. December opened its lower at 35%, and steadily up to 36% c. broke and closed weak at 91% c. against 95% c. at the close yesterday.

Corn was active and generally firm, selling up early, partly in sympathy with the strong feeling in wheat, and later it broke off some when wheat began to weaken. Business was not as animated as yesterday, and the most nervous shorts here apparently covered.

Hog products were generally firm, largely in sympathy with the early strength in grain, but much of the advance was lost during the last hours. Pork shows an advance at the close compared with yesterday of 7% 106c.

Lard is 25% 5c lower, except January, which is unchanged, and ribs are 25% 10c lower, except January, which like lard is unchanged.
